Weekly Report KARIMI 2021-08-06

My work this week has mainly been towards making progress both AAAI 2022 papers.

1. Experiments and Redaction for STANLey paper.

2. Reviews for NeurIPS papers (some of them need two sets of reviews).

1 STANLey paper

For the STANLey project, I have made improvements on the overleaf paper and point you to the paper itself to see the substantial progress. In short, I have made sure we present three types of experiments: 1) toy case (Mixture model retrieval), 2) Image generation (FID and visual for CIFAR and Flowers) and 3) Image inpaintings (FID for Celeb done, need to do visual check for the baselines (running now)). AAAI template has been used on overleaf for the next month deadline.

Please refer to the paper on overleaf as most of the improvements are there.

2 NeurIPS Reviews

Please refer to the overleaf projects of each paper to check the progress on the rebuttals.
